UNIVERSITY OF WORCESTER ARENA 2013

AUSTIN HOUSE 1939

**ART HOUSE
2018**

An aerial photograph showing a large, cleared area of land, likely a former dust cart depot. The area is mostly bare earth with some scattered debris, including blue tarps and piles of rubble. A prominent brick viaduct with multiple arches runs horizontally across the upper portion of the image. To the right, there are several multi-story brick residential buildings with gabled roofs and dormer windows. A road or driveway curves through the residential area. The overall scene suggests a site undergoing significant redevelopment or cleanup.
